24) Sinks down, call it a
day (4)

Star floating

Star just under

Water too high

Water too low

The diagram shows a hexagonal lattice with 9 numbered nodes (1-9) and 6 shaded triangles. The nodes are arranged in a 3x3 grid. The triangles are shaded in a pattern that forms a larger hexagon in the center. The nodes are numbered as follows: 1 is at the top center, 2 is at the top left, 3 is at the top right, 4 is in the middle, 5 is at the bottom left, 6 is at the bottom right, 7 is at the bottom center, 8 is at the middle left, and 9 is at the middle right. The shaded triangles are located at the top, bottom, left, and right edges of the central hexagon.

Down – 1) NTRPRSS (enterprises), 2) BDVRSTY (biodiversity), 3) RNGSTRR (Ringo Starr), 4) NTN-STY (intensity), 5) RSTRN (restrain), 6) STRFRY (stir-fry), 7) XPDTN (expedition).
